

Heavy duty coin sorter/counter

Engineered for Performance and Reliability

The S-500 Series Heavy Duty Mixed Coin Sorter and Value Counter offers reliable and accurate sorting, counting and value counting of all five U.S. coin denominations in a durable, compact design.

Ease of use

The S-500 Series Mixed Coin Sorter / Value Counter features an easy to use control panel while offering more features and options than other coin sorters.

Sorting and Counting Functions

The model S-520 can sort and count all five U.S. coin denominations simultaneously and provides value counting displays for each denomination and the total of all denominations. The machine can also optionally display accumulated totals for multiple sorts.

Flexible Batching

This Mixed Coin Sorter / Value Counter enables the operator to select batch stop settings for each denomination separately (typically used in coin packaging/wrapping applications) or for all denominations together (typically used in bagging applications). Batching may also be turned off if not desired.

Bagging and Packaging Options

Separate optional bagging and packaging/wrapping attachments are available for each coin denomination. The optional machine clamp kit should be used when bagging.

Superior Sorting Mechanism

The S-500 Series Mixed Coin Sorter / Value Counter employs a motorized chain driven sorting mechanism not prone to the jamming and maintenance problems associated with gravity and rail type sorters.

Exceptional Durability

The model S-520 features a solid metal chassis and heavy duty metal components designed to withstand the heavy use found in commercial sorting and counting applications.

Compact Design

This machine is designed to provide the functionality and performance of much larger machines but in a smaller package that can fit on your desktop or tabletop.

Optional Accessories

Bagging attachments (coin sizes sold separately), packaging/wrapping attachments (coin sizes sold separately), machine clamp kit.

S-500 series

Coin Types

U.S. penny, nickel, dime, quarter, dollar
